BEFORE YOU DIVE IN

A checklist, not a lecture.

Most listing-marketing guides read like a textbook. This one doesn't. It's a print-and-check-off list of every deliverable a listing needs — from the moment you sign the listing agreement to the day you post "Just Sold."

It's split into two parts on purpose. **Part One** covers the logistics — photos, signage, showings, paperwork. The hands-on work only you can do. **Part Two** covers the marketing content — every MLS description, every social post, every email, every script, every landing page. The work that eats your afternoon.

Items marked with a purple number and an AUTO badge are the pieces ListingIgnite generates automatically in a single pass. Paste your listing details once, get all eleven back at once. Watch for them as you read.

Print it. Tape it to your desk. Use it on your next listing. If Part Two makes you think "*there has to be a faster way to do this*," that's the point.
